Prerequisites (course must be taken prior to this course)  
AGRN 2040 and BIOL 1020 (or author permission)

Corequisites (course must be taken the same term of this course)  
None

Prerequisite with concurrency (course may be taken prior to this course or taken during the same term)  
None
**Brief Description for Bulletin** This course is the distance version of Turfgrass management, and is intended for anyone who currently manages turfgrass, or who has interest in that area of science. The objective of the course is to educate students about turfgrasses grown throughout the world, with an emphasis on those managed in the southeast United States. The history, development, introduction and major cultivars of the predominate warm- and cool-season turfgrasses will be covered.

Credit will not be given for both AGRN 3150 and this course.

**Justification (Indicate reason for change)**
This course is an addition to the current offering: AGRN 3150.

**Additional resources or resource shifting required. If none, please explain.**
None - this is an additional service to provide the course that I currently teach via distance learning.

Attach a copy of syllabus to add a new course.

To modify an existing course, attach a copy of the old syllabus and the new syllabus.

To add an honors version of an existing course or to add a distance education version of an existing, attach the existing syllabus and the syllabus for the proposed new course.

No attachment is required to delete course.
