SCMH 4920 Course Syllabus

Course Title: Sciences and Mathematics Internship

Credit: 3

Prerequisites: None

Textbook: None

Course Description: SCMH 4920, SCIENCES AND MATHEMATICS INTERNSHIP (3) Supervised, closely monitored work experience some setting related to sciences and mathematics.

Course Objectives: Students will gain work experience in a real-world setting. Students will evaluate how their classroom experiences and training were applied in real-world setting.

Course Content: The content of the course will vary widely depending on the location of the internship and the sponsoring agency. Students should strive to learn as much as they can and relate what they have learned in the classroom to real-world experiences.

Course Evaluation: Students will be required to prepare a written summary of their internship experience including specific reference on how the experience reinforced what they had learned in the classroom. This written summary should be at least 10 pages in length and should be submitted to the project supervisor and to the instructor of record before a final grade is assigned.

The internship supervisor will communicate with the instructor of record indicating the quality of the student’s performance during the internship. The instructor of record will submit the final grade.

A final grade of S or U will be assigned.

Attendance: Students are expected to fulfill all of the requirements of the internship as stipulated by the internship advisor. Students who do not fulfill these requirements will receive a U.
