**Brief Description for Bulletin** This is the second of a three-studio progression in the Master of Design-Build program. The studio emphasizes the skills and abilities associated with the project formation and schematic design phases of an architectural project, and addresses how rigorous design research methods, thoughtful program development, and successful collaboration within interdisciplinary teams at these phases can set the stage for successful projects. The project initiated during this semester will carry over into the final semester (summer) of the program.

Credit will not be given for both ___________ and ___________.
