

College of Agriculture

Agricultural Communications: Needs a complete revision. 1) Did not include a model. 2) MATH 1130 is 3 hours. 3) Needs at least 30 hours in the major and 120 total hours. 4) model provided as "current" did not appear to match the model in the AU Bulletin.

Agricultural Economics: Approved by committee as having no significant problems. Because of variable credits for Agricultural Electives, it was suggested that the free elective in the sophomore year be 2-3 hours (instead of 2) and the total 15-16. Similar it was suggested that the free elective in the junior year be 4-5 hours (total unchanged). For junior year, first term the hours could be changed to 14-15.

Agronomy: Minor changes needed. 1) One humanities class has been restricted to Philosophy. Students may meet SLO 3 through certain HONRs courses as well. 2) Business Track has 121 hours, not 120 as stated at the bottom. The problem arises in spring of the junior year. Students would only take 13 hours that term, not 14. 3) Students may miss SLO 9 unless a footnote is included in the model that directs the student to specified social science or humanities classes if they do not take World History for core history.

Animal Science: Major revision required for muscle foods. The committee could count only 28-29 hours in the major. The "old option" provided does not match the Bulletin. ANSC 3610, a required major course in the Bulletin, has been dropped in both the old and new models provided for this option. Other options: Need minor revisions: 1) "Core Philosophy" is not acceptable terminology under the new core. See general sheet for suggestions. 2) Should have "Core fine arts," not "core arts."

Environmental Science: Approved by committee.

Fisheries: Minor changes needed. 1) "Core Philosophy" is not acceptable terminology under the new core. See general sheet for suggestions. 2) Students may miss SLO 9 unless a footnote is included in the model that directs the student to specified social science or humanities classes if they do not take World History for core history.

Horticulture: Fruit and Vegetable must redo as they changed things beyond the core.

Other options: 1) "Core Philosophy" is not acceptable terminology under the new core. See general sheet for suggestions. 2) Students may miss SLO 9 unless a footnote is included in the model that directs the student to specified social science or humanities classes if they do not take World History for core history.

Poultry Science: Minor changes needed. 1) "Core Philosophy" is not acceptable terminology under the new core. See general sheet for suggestions. 2) Reword the footnote. Suggest, "Any Social Science may be taken if HIST 1010/1020 are taken. If HIST 1210/1220 taken, student must have at least one social science from an approved list (ANTH 1000, GEOG 1010, SOCY 1000, or UNIV 2720). 2) "Core Literature" not "Literature Selection" 3) Core History 1 and Core History 2 to denote sequence for history.

College of Architecture, Design, and Construction

Architecture: Major revision needed. 1) Need to specify at least one Core Literature and one Core History and add a footnote indicating one sequence must be completed. One SS choice should read "Core History or Core Social Science." One humanities choice should read "Core Literature or Core Humanities" and add a footnote saying there must be one sequence. 2) Students may miss SLO 3 and SLO 9. Add footnotes to direct students to complete these SLOs. 3) Concepts of Science must now be taken before PHYS 1500, and the model shows it taken after. Correct so that students know that Concepts must be first.

Building Science: Approved without changes.

Environmental Design: Major revision needed. 1) Designate sufficient hours (at least 30) in the major in boldface. 2) Need to specify at least one Core Literature and one Core History and add a footnote indicating one sequence must be completed. One SS choice should read "Core History or Core Social Science." One humanities choice should read "Core Literature or Core Humanities" and add a footnote saying there must be one sequence. 2) Students may miss SLO 3 and SLO 9. Add footnotes to direct students to complete these SLOs.

Graphic Design: Major revision needed. 1) Oral Communications not specified. 2) Why restrict only to World Lit when there are other Literature choices? 3) Need to specify at least one history class. 4) Students may miss SLO 3 and SLO 9 unless directed to appropriate classes in footnotes.

Interior Architecture: : Major revision needed. 1) Need to specify at least one Core Literature and one Core History and add a footnote indicating one sequence must be completed. One SS choice should read "Core History or Core Social Science." One humanities choice should read "Core Literature or Core Humanities" and add a footnote saying there must be one sequence. 2) Students may miss SLO 3 and SLO 9. Add footnotes to direct students to complete these SLOs.

Subject: Core revision

Gary and Amit:

The College of Business did not provide a semester by semester model for the new core. The UCC needs to see the model as this is what is provided to students during CWE.

Also, a plan to meet the oral communications requirement was not provided. We need that also.

Thanks.

Patricia

College of Education

These models were approved as is: Social Science/History, Geography

Most models needed minor revisions.

The following models need a footnote indicating students must complete one sequence, either in Literature or History: Agriscience, Business & Marketing, Early Childhood, Elementary Ed, Exercise Science, Science/Biology, Health, Music, Physical Ed, Rehab.

The following models must specify the History sequence as they are using COMM 1000 in the core and there are not sufficient core hours in area 2 or a literature sequence: Chemistry, Foreign language (all models), Math, Collaborative.

The following model needs to specify the science course must meet the sequence requirement: English language arts.

One model had additional problems:

Physics: 1) This model has 127 hours. With COMM 1000 in the core, why do they not reduce the total hours? 2) Specify the history sequence as there is no room in area 2 for a second literature.

Samuel Ginn College of Engineering

Aerospace: Needs significant revision. 1) ENGL 1120 is a prereq for the literature classes. The Literature classes cannot precede ENGL 1120 in the model. 2) Does not indicate the student needs to complete a sequence in History or Literature 3) Do not put SLOs in the model. Direct students to humanities and social sciences and then use footnotes to limit choices so students get the needed SLOs (see general comments sent to associate deans) 4) By specifying Literature/History as alternative choices in 3 places, the model allows a student to take 4 history classes, no literature, and no other social science. This needs to be corrected.

Biosystems: Minor revision needed. Student could miss SLO 9 unless choices are restricted via a footnote.

Civil: This one was approved but there is a question. Why restrict the student to HIST 1020 instead of allowing HIST 1010 as an alternative?

Chemical: Needs revision. 1) Need to specify students must have a literature sequence and a history sequence and at least one class in each. 2) What is a “core selection”? Could be anything, including math and science. Must specify humanities or social science (one or the other, not both) in these spots. 3) Student could miss SLO 9.

Computer Science: Approved. However, the Committee would like to point out that the major could move COMM 1000 into the core, require the history sequence, and save 3 hours.

Computer Engineering: Minor revision. 1) Please add a footnote directing students to complete either a history or literature sequence.

Electrical Engineering: Minor revision. 1) Please add a footnote directing students to complete either a history or literature sequence.

Industrial & Systems: Minor revision. 1) Please add a footnote directing students to complete either a history or literature sequence. 2) Student may miss SLO 9 unless directed in a footnote to take an appropriate course.

Materials: Minor revision. 1) Indicate that the core history is a sequence “Core History 1”, “Core History 2.”

Mechanical: Minor revision. 1) Does the department want to restrict specifically to World Lit? Other Lit choices are available. (It is their choice if they do want to restrict, but the Committee thought this may be an oversight.) 2) The final footnote is confusing. See general comments sent to associate deans on directing students to cover SLO 9.

Software: Approved by Committee.

Polymer (both models): Need a significant revision. 1) The areas must be specified more clearly so that students are directed to take 4 classes in area 2 and 4 classes in area 4. 2) Students must be directed to take a least one history and one literature course and at least one sequence (see comments sent to associate deans). 3) Students may miss SLO 9 and should be directed via a footnote to take at least one class under this SLO (see general comments sent to associate deans). 4) Course syllabi are not needed.

Wireless (both models): Minor revision. Student may miss SLO 9 if not directed in a footnote to cover this SLO. In WIRS model, should be “core fine arts” not “arts elective.”

School of Forestry and Wildlife Sciences

Pre-Fory : Revise to bring into line with standard language for new core. 1) “Core Philosophy” is not an acceptable term under the new core. See general sheet sent to associate deans for preferred terminology. 2) The choices under area 2 and are 4 could be confusing to students. See general sheet sent to associate deans for suggestions.

Wildlife: Revise to bring into line with standard language for new core See general sheet sent to associate deans for preferred terminology. 1) No longer have SS1 and SS2.

Wildlife-Pre-vet: Significant revision needed. 1) See general sheet sent to associate deans for preferred terminology on handling Lit, History and sequences. 2) No longer have SS1 and SS2. 3) Because COMM 1000 is in the core, a history sequence must be taken as there are not sufficient hours left in humanities for a second literature course. 4) Physics has embedded labs. There are no separate lab courses (e.g. no PHYS 1501, 1511.)

College of Human Sciences

Apparel Merchandising (Product Design): Significant revision needed. 1) Students are not clearly directed to have 4 courses in humanities and 4 in social science. Sophomore year, choice should be “Core Literature 2 or Core Humanities,” not “Core Literature 2 or Core History 2.” 2) Students could miss SLO 9 and 3. Please direct them to appropriate choices using footnotes.

Apparel Merchandising (Apparel): Significant revision needed. 1) Students are not clearly directed to have 4 courses in humanities and 4 in social science. Sophomore year, choice should be “Core Literature 2 or Core Humanities,” not “Core Literature 2 or Core History 2.” 2) Students could miss SLO 9 and 3. Please direct them to appropriate choices using footnotes. 3) Fix credit hours in freshmen terms. One class from spring needs to be in the fall. As written, there are 13 hours in fall, 19 in spring.

Interior Design: Significant revision needed. 1) Students are not clearly directed to have 4 courses in humanities and 4 in social science. Sophomore year, choice should be “Core Literature 2 or Core Humanities,” not “Core Literature 2 or Core History 2.” 2) Students could miss SLO 9 and 3. Please direct them to appropriate choices using footnotes.

HDFS: Minor revisions needed. 1) Sophomore year hours do not add up. One 3 hour class needs to move from fall to spring semester. 2) Students could miss SLO 9 and 3. Please direct them to appropriate choices using footnotes.

Hotel & Restaurant Management: Approved pending clarification. Is ECON 2030 in the core or a supporting class? If in the core, there are 5 SS courses. If supporting, okay.

Nutrition-dietetics & Nutrition (same issues): Minor changes needed. New students would take courses under NTRI prefix. (Correct degree name also to eliminate Food Science.)

College of Liberal Arts

Two files were in fairly good shape. ENGL and History. Minor changes. 1) indicate science sequence (Core Science 1, Core Science 2). 2) Revise terminology for “core philosophy” using guidelines provided on general information given to associate deans.

All other models need fairly substantial revisions.

A common error in a number of models was that Literature or History were given as alternative for one class. Clear specification of the real choice, “Core Literature 2 or Core Humanities” and “Core History 2 or Core Social Science” needs to be made instead to ensure that students take 4 courses in each area. This error affected almost every model.

Many models did not specify Core Science 1 and Core Science 2 to ensure a sequence.

In some models, COMM 1000 was specified in the Core Humanities. For these models, the sequence must be in history as there will not be enough hours left in humanities to accommodate a second lit (COMM 1000, Humanities to cover SLO 3, one Lit and Core fine arts).

Other problems are noted:

COMM: 1) Hours add to 118, not 120. 2) Cannot count COMM 1000 in both the core and the major.

CMDS: 1) “Core Philosophy” is not an acceptable term. See general notes for suggested wording. 2) What is meant by “elective/supporting”?

JRNL: 1) We counted only 6 classes combined in areas 2 and 4. Need 8. 1) Take electives out of boldface as boldface is for major classes. 2) Electives should not be grouped with supporting courses. Supporting course are normally specified courses or specified from a menu, while electives unless directed electives are free choices. 3) JRNL 2310 was dropped from new model and there are now not enough hours in the major. (Need 30).

Public Relations: 1) Take COMM 1000 out of boldface. It can't be in the core and in the major both. 2) What are “major electives”?

RTVF (both models): 1) Take COMM 1000 out of boldface if using in the core. 2) What is meant by “supporting cognate”?

ECON: 1) Must add another social science class or move ECON 2030 out of major to use in the core instead. 2) electives can't be in the major unless they are “directed electives” from a menu.

German-trade: 1) hours do not add correctly in several semesters. Please check the addition of the hours.

Spanish-trade: 1) Core fine arts listed twice. 2) COMM 1000 listed twice.

SOWO: 1) Need to put PSYCH in core or short hours in social sciences. 2) Core history is labeled an elective in margin.

PHIL: Appears to have a total of 9 courses combined in areas 2 and 4 and only need 8. One course needs to be a supporting course if the major wants all 9 classes.

PHIL-relg: 1) Appears to have a total of 9 courses combined in areas 2 and 4 and only need 8. One course needs to be a supporting course if the major wants all 9 classes. 2) Does not need special designation for SLO 3 because PHIL already in core.

Subject: Nursing revised core approved

Jenny:

The UCC approved the model for the revised core for Nursing.

Thanks.

Patricia

College of Sciences and Mathematics

Pre-OPT: **Significant Revision:** Missing one core social science class. (Suggestion: Add to second semester junior year and bring hours to 15).

Pre-PHARM: **Significant Revision:** Missing one humanities class. Students have no way to meet oral communication SLO. The UCC recommends that COSAM ask Liberal Arts to add COMM 1000 to this pre-professional model. Pharmacy will not be assessing their classes for general education outcomes, so this is the only way a student following this pre-professional program can meet the SLO.

MATH (all models): **Significant Revision.** 1) Can't use a core course (MATH 1610) in the major. Must take out of the major. 2) FLGC 1150 is humanities, not SS, so should not be on the list in a footnote for a SS class. 3) "Core Philosophy" is not an acceptable term for new core. See general information sent to associate deans for suggested phrasing.

GEOG: **Significant Revision.** 1) Appears to confuse areas 2 and 4. Must give students 4 classes in area 4 (social sciences) and 4 classes in area 2 (humanities) 2) Could move COMM 1000 into the core if desired. 3) Students may miss SLO 9 unless directed in a footnote to meet this SLO. 4) Limiting to philosophy classes precludes honors classes from meeting SLO 3.

Marine Biology: **Small revisions needed.** 1) "Core Philosophy" is not an acceptable term for new core. See general information sent to associate deans for suggested phrasing. 2) Need to put in a footnote that students need 4 courses in humanities (including lit) and 4 in SS (including history).

Microbiology & Microbiology, cellular, molecular: **Small revisions needed.** 1) "Core Philosophy" is not an acceptable term for new core. See general information sent to associate deans for suggested phrasing. 2) Need to put in a footnote that students need 4 courses in humanities (including lit) and 4 in SS (including history).

Biomedical Sciences: **Small revisions needed.** Physics has embedded lab, no separate class.

Botany (both models): **Small revisions needed.** 1) "Core Philosophy" is not an acceptable term for new core. See general information sent to associate deans for suggested phrasing. 2) Need to put in a footnote that students need 4 courses in humanities (including lit) and 4 in SS (including history).

CHEM BA: **Small revisions needed.** 1) "Core Philosophy" is not an acceptable term for new core. See general information sent to associate deans for suggested phrasing. 2) Need to put in a footnote that students need 4 courses in humanities (including lit) and 4 in SS (including history). 3) Social Sciences groupings no longer exist. (No group 1 and group 2 any longer.)

CHEM BS: **Small revisions needed.** 1) "Core Philosophy" is not an acceptable term for new core. See general information sent to associate deans for suggested phrasing. 3) Social Sciences groupings no longer exist. (No group 1 and group 2 any longer.) 3) core PHYS has embedded labs, not separate courses.

Biochem: **Small revisions needed.** 1) "Core Philosophy" is not an acceptable term for new core. See general information sent to associate deans for suggested phrasing. 3) Social Sciences groupings no longer exist. (No group 1 and group 2 any longer.) 3) core PHYS has embedded labs, not separate courses.

LABT: **Small revisions needed.** 1) "Core Philosophy" is not an acceptable term for new core. See general information sent to associate deans for suggested phrasing. 2) Social Sciences groupings no longer exist. (No group 1 and group 2 any longer.) 3) core PHYS has embedded labs, not separate courses.

MEDT: **Small revisions needed.** 1) “Core Philosophy” is not an acceptable term for new core. See general information sent to associate deans for suggested phrasing. 2) Social Sciences groupings no longer exist. (No group 1 and group 2 any longer.) 3) core PHYS has embedded labs, not separate courses.

GEOLOGY: **Small revisions needed.** 1) “Core Philosophy” is not an acceptable term for new core. See general information sent to associate deans for suggested phrasing. 2) core PHYS has embedded labs, not separate courses. 3) GEOL 4740 is a 1 hour course but is listed as 2 hours in model. Correct and adjust hours accordingly.

PHYSICS: **Small revisions needed.** 1) “Core Philosophy” is not an acceptable term for new core.

ZOOLOGY (all models): **Small revisions needed.** 1) “Core Philosophy” is not an acceptable term for new core. See general information sent to associate deans for suggested phrasing. 2) Need to put in a footnote that students need 4 courses in humanities (including lit) and 4 in SS (including history). 3) PHYS has embedded lab, not separate lab class.

Pre-Professional Models

Pre-med, Pre-vet & Pre-Physical Therapy: PHYS 1501 doesn't exist (embedded lab).
